7th Aug 2012

To
Mr. ARUN
M/s SRIRAM HERBALS

Dear Sir,

Sub: GLUCOCARE – HERBAL MEDICINE – Usage performance report – Reg.

I, Dr.N.Shanmugam, 57 years old, have been diabetic since 2004. I have been using the allopathic drugs viz. Glicazid, Glibenclamide, Metformin, Glimipride and Pioglitazone in various combinations. The blood sugar level decreased from 396mg to 354mg.

Meanwhile, I tried GLUCOCARE (SRIRAM HERBALS) with Metformin and Glimipride for a period of 90 days. My blood sugar level gradually came down from 354mg to 198mg. I have tested, taking GLUCOCARE alone, without any allopathic drug, the blood sugar level was found to be 248mg.

To my knowledge, I have found that, SRIRAM HERBALS GLUCOCARE has good tolerance and gave no side effects. I feel better now, not feeling tired and thirsty often and carrying out my daily work without any stress and strain.

Sincerely,
Dr.N.SHANMUGAM
